SHANU SHAHANAS KOHINOOR

Junior MERN Stack Developer

+44 7810 059717 | shahanaskohinoor@gmail.com | Birmingham, UK

GitHub | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Junior MERN Stack Developer transitioning into software development from a healthcare background (Bachelor of Dental Surgery). Hands-on experience building and deploying full-stack web applications using MongoDB, Express.js, React.js, and Node.js, including REST API development, JWT authentication, and state management with Redux Toolkit. Delivered full-stack projects covering task management, e-commerce, and healthcare administration. The transition from clinical practice brings strong discipline, precision, and a structured, detail-oriented approach to problem-solving. Currently completing an intensive MERN Stack training programme and looking to apply these skills in a junior development role.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), HTML5, CSS3, Java (Basic)

Frontend: React.js, Redux Toolkit, Context API, Tailwind CSS, Responsive Design, Framer Motion

Backend: Node.js, Express.js, REST APIs, Socket.IO, JWT Authentication

Database: MongoDB, Mongoose

Tools & Workflow: Git, GitHub, VS Code, Thunder Client, Chrome DevTools, Debugging, SDLC

Other: Nodemailer, EmailJS, Stripe API, Deployment (Vercel, Render)

PROJECTS

SmartTask Manager – MERN Stack Task Management Application with AI Assistant Live Demo | GitHub

Tech Stack: *React.js, Redux Toolkit, Node.js, Express.js, MongoDB, JWT Authentication, Tailwind CSS, Groq API*

- Built a full-stack MERN task management application with **JWT authentication**, protected routes, and **Redux Toolkit** state management supporting complete CRUD functionality.
- Implemented search, filtering, sorting, and duplicate-task prevention to keep task organisation efficient and reliable.
- Added an AI Assistant feature using the **Groq API** to generate task suggestions based on user goals, then built a responsive Tailwind CSS interface and deployed the frontend on Vercel and backend on Render.

HomeNesto – E-Commerce Application Live Demo | Frontend GitHub | Backend GitHub

Tech Stack: *React.js, Context API, Axios, REST API, Stripe, Tailwind CSS*

- Built a responsive e-commerce storefront using **React.js** and Context API, featuring product listings, cart management, and a multi-step checkout flow.
- Connected the frontend to backend REST APIs using Axios to handle dynamic product data and cart state.
- Integrated **Stripe** for secure payment processing and used Framer Motion to add UI transitions across reusable React components.

PeachBlossom Dental Clinic – Full Stack Healthcare Management App [Live Demo] | [GitHub]

Tech Stack: *Node.js, Express.js, MongoDB, Nodemailer, Tailwind CSS, JWT Authentication*

- Built a full-stack patient and appointment management system, applying clinical background to design realistic, user-relevant workflows.
- Developed **REST APIs** with **CRUD** operations using **Express.js** and **MongoDB**, secured with JWT-protected routes restricting access to authenticated users.
- Implemented a secure account activation workflow using Crypto-generated tokens, Nodemailer for email delivery, and **Bcrypt** for password hashing.

Personal Portfolio Website – React Developer Portfolio [Live Demo]

Tech Stack: *React.js, EmailJS, Framer Motion, Tailwind CSS*

- Built a responsive developer portfolio using **React.js** to showcase projects, technical skills, and professional background.
- Added interactive animations and page transitions with Framer Motion to enhance user experience.
- Integrated a working contact form using EmailJS and deployed the site on Vercel.

EDUCATION

Bachelor of Dental Surgery (BDS) | 2008 – 2013

Healthcare background with clinical training, strong analytical skills, and structured problem-solving.

MERN STACK TRAINING

MERN Stack Development Training | 2025 – Present

Full-stack development training covering HTML, CSS, JavaScript, Node.js, Express, MongoDB, React.js, and Redux Toolkit.

LANGUAGES

English (Fluent) | Malayalam (Native)
